

Nearby Car Seat Safety Checkpoint Sites

South Florida

The PARENT is responsible for installing an infant car seat and placing their baby safely in the car seat upon discharge from the hospital...NOT the Nurses or hospital staff!

Please plan to attend a car seat safety checkpoint site prior to your baby's birth to learn correct installment of your infant or convertible car seat to properly protect your baby. **PLEASE DO NOT "just show up"** at your local police or fire station! Not all stations always have "Certified Car Seat Safety Technicians" on duty.

You must call to make an appointment to verify the location and times.

The next available appointment could be days or weeks away...so CALL AS SOON AS POSSIBLE to make your appointment! Please **arrive a few minutes EARLY** for your appointment to fill out paperwork & **BRING:**

- Your vehicle and the owner's manual for that car
- Your child/older children if applicable
- Your car seat(s), car seat manual(s) and registration card(s)

Be prepared to spend some time at the checkpoint site.

Allow approximately 20-30 minutes per seat! The safety technician will check your car seat for proper installation, safety and recall status, and provide you with education. Upon completion, you should be able to remove and reinstall the car seat by yourself if necessary. Do not hesitate to ask questions!
